

MAX WINFIELD

Junior Software Developer | Computer Science Student

maximo.winfield.7@gmail.com

5513407335

171 Avenue F, Bayonne, NJ, USA

github.com/maximowinfield

Computer Science student with experience developing full-stack applications using React, Node.js, and REST APIs. Skilled in building user-focused features, supporting backend integration, and collaborating within Agile development environments while bringing strong operational and problem-solving experience from high-volume logistics roles.

SKILLS

- JavaScript
- Python
- C#
- React
- Node.js
- ASP.NET Core
- SQL
- Git
- REST APIs

PROJECTS

[JobTracker](#) - Maximo Winfield

Dec 2025 - Jan 29

- Built a full-stack job application tracking system to manage applications, company details, statuses, dates, and follow-up activity.
- Developed REST API endpoints with ASP.NET Core and SQLite to support create, read, update, and delete operations for application records.
- Implemented JWT-based authentication and pagination to improve security, organization, and usability for larger application lists.

[task-rewards-management-system](#) - Maximo Winfield

Aug 2025 - Jun 30

- Developed a full-stack task and reward management application that allows users to create tasks, track completion, and manage reward progress.
- Built backend API functionality for task creation, updates, completion tracking, and persistent data storage.
- Connected React frontend components to REST API endpoints, improving user interaction and maintaining a cleaner separation between frontend and backend logic.

WORK EXPERIENCE

Thaddeus Resource Center - Software Developer

Jan 2025 - Jan 2026

Remote

- Developed user-facing features for a mobile support application using React and Node.js, including user authentication and profile management, while assisting with backend integration to improve deployment speed.
- Collaborated with a team of 5 developers using Java and Python to troubleshoot bugs, enhancing application functionality and supporting the implementation of resource request workflows.
- Collaborated on developing automated forms and internal workflow tools using JavaScript and React, enhancing resource coordination for community support services.

Amazon - Learning Ambassador

Jun 2022 - current

Edison, NJ

- Led onboarding and hands-on training for 20+ new associates, reinforcing operational procedures, safety standards, and productivity expectations in a high-volume fulfillment environment.
- Collaborated with warehouse leadership to identify and resolve major workflow disruptions, enhancing floor operations and achieving 15% increase in productivity and meeting operational quality standards.

United States Postal Service - Mail Processing Clerk

Jan 2017 - Jan 2022

Kearny, NJ

- Operated automated mail processing and scanning systems within a high-volume logistics environment, maintaining accuracy and efficiency across daily distribution workflows.
- Collaborated with a team of 20 to process thousands of mail items daily while adhering to safety protocols and meeting strict productivity targets.

EDUCATION

Southern New Hampshire University - Bachelor of Science, Computer Science

2024 - 2027, GPA: 3.822 Expected April 2027

Awards

- President's List and Honor Roll recipient across multiple academic terms

Relevant courses

- CS-300: DSA: Analysis and Design
